| 今天修改

▼一、Vue.js 相关

1. Vue.js Related

1. Vue 2 和 Vue 3 的主要区别有哪些？例如响应式原理、Composition API、生命周期等。
 - What are the main differences between Vue 2 and Vue 3? For example, reactive principles, Composition API, lifecycle hooks, etc.
2. Vue 3 的 Composition API 与 Options API 相比，有什么优势和劣势？考察他对新特性的理解和使用场景。
 - Compared to Options API, what are the advantages and disadvantages of Vue 3's Composition API? This examines their understanding and use cases for new features.
3. Vue 中的响应式原理是什么？可以追问Vue 2（Object.defineProperty）和Vue 3（Proxy）的实现差异。
 - What is the reactive principle in Vue? You can delve into the implementation differences between Vue 2 (Object.defineProperty) and Vue 3 (Proxy).
4. Vue 组件间通信的方式有哪些？例如props、emit、provide/inject、vuex/pinia、事件总线等。
 - What are the ways of communication between Vue components? For example, props, emit, provide/inject, vuex/pinia, event bus, etc.
5. 你如何管理Vue应用的状态？可以聊一下Vuex和Pinia，以及为什么现在推荐使用Pinia。
 - How do you manage state in Vue applications? You can talk about Vuex and Pinia, and why Pinia is now recommended.
6. Vue 的生命周期有哪些？并说明每个生命周期适合做什么操作。
 - What are the lifecycle hooks in Vue? And explain what operations are suitable for each lifecycle hook.
7. 你如何优化Vue应用的性能？例如使用v-if和v-show的区别、计算属性和方法的区别、组件懒加载、keep-alive等。
 - How do you optimize the performance of Vue applications? For example, the difference between v-if and v-show, computed properties vs methods, component lazy loading, keep-alive, etc.

二、前端基础

2. Front-end Fundamentals

1. 如何实现一个元素的水平垂直居中?
 - How to achieve horizontal and vertical centering of an element?
2. 解释一下HTTP/HTTPS, 以及常见的状态码 (如200、404、500、502等)。
 - Explain HTTP/HTTPS, and common status codes (e.g., 200, 404, 500, 502, etc.).
3. 什么是跨域? 如何解决跨域问题?
 - What is Cross-Origin Resource Sharing (CORS)? How to solve cross-origin issues?
4. 什么是Webpack? 你常用的配置有哪些? 或者问Vite和Webpack的区别。
 - What is Webpack? What configurations do you commonly use? Or what are the differences between Vite and Webpack?
5. Typescript用过哪些?
 - What have you used TypeScript for?

三、性能优化

3. Performance Optimization

1. 你提到优化过程要多多系统, 能具体讲讲你做了哪些性能优化吗? 考察他实际项目经验。
 - You mentioned that the optimization process needs to be systematic. Can you specifically talk about what performance optimizations you have done? This examines their practical project experience.
2. 如何减少页面加载时间? 可以从资源压缩、懒加载、代码分割、缓存策略等方面回答。前端代码如何打包, 进行发布, 缓存如何处理。
 - How to reduce page load time? You can answer from aspects like resource compression, lazy loading, code splitting, caching strategies, etc. How is front-end code bundled, deployed, and how is caching handled?

四、项目经验与架构

4. Project Experience & Architecture

1. 请描述一个你参与过的复杂前端项目，你在其中扮演的角色，以及你遇到的最大技术挑战 and 解决方案。
 - Please describe a complex front-end project you have participated in, your role in it, and the biggest technical challenge you encountered and its solution.
 2. 你如何设计一个可复用的Vue组件？考虑组件的通用性、可配置性、事件通信等。
 - How do you design a reusable Vue component? Consider the component's generality, configurability, event communication, etc.
 3. 你如何与后端协作进行API联调？例如使用Swagger、Mock数据等。
 - How do you collaborate with the backend for API integration? For example, using Swagger, Mock data, etc.
 4. 前端登录做了哪些工作？
 - What work is involved in front-end login functionality?
 5. 迁移过程中遇到了哪些问题？
 - What issues were encountered during the migration process?
-
1. 票务系统优化：“在优化10k并发用户系统时，你做了哪些具体的数据索引优化？前端如何配合？”
 - Ticketing System Optimization: "When optimizing a system for 10k concurrent users, what specific data search/index optimizations did you do? How did the front-end cooperate?"
 2. 云迁移经验：“GCP到AWS迁移中，前端需要配合做哪些改动？”
 - Cloud Migration Experience: "In a GCP to AWS migration, what changes does the front-end need to make to cooperate?"
 3. 汽车行业项目：“CARSOME项目中，你处理的最复杂的技术挑战是什么？”
 - Automotive Industry Project: "In the CARSOME project, what was the most complex technical challenge you handled?"
 4. 如何处理跨模块/跨应用的状态共享问题
 - How to handle state sharing across modules/applications?

五、全栈与后端相关（因为简历中有后端经验）

- Full-stack & Backend Related (because there is backend experience on the resume)

1. 你使用Node.js做过哪些项目？可以问一些Node.js基础，如事件驱动、非阻塞I/O等。

- What projects have you done using Node.js? You can ask some Node.js basics, such as event-driven, non-blocking I/O, etc.

六、软技能与团队协作

- Soft Skills & Team Collaboration

1. 当你和UI设计师或产品经理意见不一致时，你会如何处理？

- When you disagree with a UI designer or product manager, how would you handle it?

2. 你如何保持技术学习？最近有学习什么新技术吗？

- How do you keep up with learning technology? Have you learned any new technologies recently?

3. 如何进行跨团队合作，怎么保证项目按时交付，是否遇到不能交付的场景，如何做？

- How do you conduct cross-team collaboration, ensure project delivery on time, and if you encounter scenarios where delivery is not possible, what do you do?

4. 是否用AI解决过什么问题？怎么看待现有的AI辅助开发，你觉得AI能帮你解决哪些问题，能提高多少效率？他的欠缺性在哪里？

- Have you used AI to solve any problems? What is your view on current AI-assisted development, what problems do you think AI can help you solve, how much efficiency can it improve, and where are its shortcomings?

下午好，我是alisa,很高兴认识你，首先，请你做一下自我介绍

Good afternoon, I am Alisa, nice to meet you. First, please introduce yourself.

针对前端的技术，我问几个问题

Regarding front-end technology, I will ask a few questions.

我想要的候选人，首先技术肯定是要过去的，另外我也非常看重，积极主动性，以及独立解决问题的能力，协调能力，也是非常重要，因为马来的业务未来是会独立出去的，我需要一个独立的owner

The candidate I am looking for must first have solid technical skills. In addition, I also highly value proactiveness, independent problem-solving ability, and coordination skills, which are also very

important because the Malaysian business will become independent in the future, and I need an independent owner.

公司介绍：我们公司是一个AI科技公司，有多个海外办公室，马来，新加坡，美国，巴西，菲律宾等，业务涉及多个国家，主要以东南亚为主，目前我们在马来组建团队，各个工种都有，后端前端测试产品等，目前前端已经有一名同学了。前端这块先跟着熟悉项目，然后后面会独立负责马来的前端业务，涉及到一些私有化部署，调度项目等等；

Company Introduction: Our company is an AI technology company with multiple overseas offices in Malaysia, Singapore, the USA, Brazil, the Philippines, etc. Our business involves multiple countries, mainly in Southeast Asia. Currently, we are building a team in Malaysia, with various roles including backend, frontend, testing, product, etc. Currently, there is already one frontend colleague. For the frontend role, you will first familiarize yourself with the projects, and later you will independently be responsible for the frontend business in Malaysia, involving some privatization deployments, scheduling projects, etc.

今天的面试就到这里，后续hr会和你进行沟通

That's all for today's interview. HR will follow up with you.
